

NAVYAAN ZAHEEN PATEL

Full-Stack Web Developer | MERN Stack Specialist

Karachi, Pakistan | +92 348 2603700 | [Gmail](#) | [GitHub](#) | [Portfolio](#) | [Linkedin](#)

PROFESSIONAL SUMMARY

Results-driven Full-Stack Web Developer with 1+ year of professional experience at TechBridge Technologies, specializing in designing and developing scalable MERN stack applications. Demonstrated expertise in building production-ready features for e-commerce and hospitality platforms serving 10,000+ monthly active users. Proven track record of improving application performance, enhancing user engagement, and delivering pixel-perfect responsive interfaces. Proficient in modern web technologies including React.js, Node.js, Express.js, MongoDB, and REST API development. Committed to writing clean, maintainable code and collaborating effectively with cross-functional teams. Seeking a growth-oriented role to expand technical expertise while contributing to impactful projects.

TECHNICAL SKILLS

Frontend Development: React.js, React Hooks (useState, useEffect, useContext), Component Lifecycle, State Management, JSX, HTML5, CSS3, Responsive Design, Flexbox, CSS Grid, Mobile-First Design, UI/UX Implementation, Semantic HTML, Cross-Browser Compatibility, Performance Optimization (Code Splitting, Lazy Loading)

Backend Development: Node.js, Express.js, REST API Design and Development, API Architecture, Middleware Implementation, Authentication Mechanisms (JWT, Session-based), Authorization, Error Handling & Validation, RESTful Principles, Server-Side Logic, Request/Response Handling

Databases & Storage: MongoDB, Collections & Documents, Schema Design, NoSQL Database Management, CRUD Operations, Data Modeling, Query Optimization, Firebase (Authentication & Hosting), Data Persistence

Programming Languages & Markup: JavaScript (ES6+, ES7+), HTML5, CSS3, Python, JSON, XML

Developer Tools & Platforms: Git & GitHub (Version Control, Branching, Pull Requests), Firebase (Hosting, Database, Authentication), REST API Testing (Postman), Browser DevTools (Chrome, Firefox), Command Line Interface, npm & yarn (Package Management), Responsive Design Testing, Performance Monitoring Tools, Web Accessibility Tools

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer

TechBridge Technologies | Karachi, Pakistan
August 2024 – August 2025 (1 Year)

Live Url: [https://Techbridge Url](#)

- Engineered and maintained 5+ production-ready full-stack web applications using React.js, Node.js, Express.js, and MongoDB, serving 10,000+ monthly active users with 99.5% uptime and implementing SOLID principles for code scalability and long-term maintainability
- Architected responsive, mobile-first frontend interfaces for e-commerce and hotel booking platforms using React hooks and component-based architecture, reducing

bounce rate by 18% and improving user engagement metrics by implementing intuitive navigation, streamlined user flows, and accessibility best practices

- Developed core features including JWT-based user authentication systems, product catalog management with filtering/search, shopping cart functionality with real-time updates, and multi-step booking workflows with form validation, error handling, and success confirmations, resulting in 25% increase in conversion rates
- Collaborated closely with UI/UX designers, backend engineers, and product managers in an agile environment to translate Figma designs and requirements into pixel-perfect, fully functional user interfaces with responsive design across desktop, tablet, and mobile devices (iOS and Android)
- Debugged complex production issues using Chrome DevTools and server logs, reducing bug resolution time by 40%. Optimized application performance including rendering optimization (React.memo, useMemo), API call optimization, and bundle size reduction from 450KB to 220KB, improving Lighthouse performance score from 65 to 92
- Ensured cross-browser compatibility across all major browsers (Chrome, Firefox, Safari, Edge) and responsive design validation on 20+ device sizes using browser testing tools, reducing user-reported bugs by 30% and improving overall user satisfaction scores
- Performed code reviews on 50+ pull requests, provided constructive feedback on code quality and architecture, participated in daily standups and bi-weekly retrospectives, and contributed to establishing code standards and best practices documentation that improved team velocity by 20%

FEATURED PROJECTS

E-Commerce Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, Firebase | Hosted on Firebase

- Full-featured MERN stack e-commerce application with 500+ product listings, advanced filtering (category, price range, ratings), real-time shopping cart management, secure user authentication with JWT tokens, order tracking system, admin dashboard for inventory and order management, payment integration, email notifications, and fully responsive design optimized for mobile and desktop. Achieved 92 Lighthouse score for performance, accessibility, and SEO.

[Github Link](#) [Live Url](#)

Hotel Booking System

Tech Stack: React.js, Node.js, Express.js, MongoDB | Hosted on Firebase

- Hotel reservation platform enabling users to search available rooms by date range, filter by price and amenities, complete multi-step booking workflows with form validation, manage existing reservations, view comprehensive booking history, and receive email confirmations. Backend API handles concurrent booking requests with data consistency, user authentication, and payment processing integration.

[Github Link](#) [Live Url](#)

Movie Trailer Hub

Tech Stack: React.js, TMDB API, Axios, CSS3 | Hosted on Firebase

- React application that fetches and displays movie trailers in real-time using The Movie Database (TMDB) API. Demonstrates advanced state management, asynchronous data handling with error boundaries, component composition, pagination for large datasets,

and responsive design. Implemented optimized API calls with caching strategies to minimize network requests.

[Github Link](#) [Live Url](#)

Weather Application

Tech Stack: React.js, OpenWeatherMap API, Responsive CSS | Hosted on Firebase

- Responsive weather application that fetches real-time weather data based on city search using OpenWeatherMap API. Features include location-based weather display, 5-day forecast, weather alerts, responsive UI for all screen sizes, error handling for invalid locations, and optimized API usage with request debouncing.

EDUCATION

Bachelor of Science in Computer Science

Iqra University, Karachi, Pakistan | 2018 – 2023

Intermediate (Pre-Engineering)

Government Degree College Gulshan-e-Iqbal, Karachi | 2015 – 2017

PROFESSIONAL DEVELOPMENT & CONTINUOUS LEARNING

- Currently learning TypeScript for type-safe JavaScript development and improved code reliability in production applications
- Exploring advanced React patterns (Context API, Redux/Zustand for state management, Error Boundaries, Suspense) and performance optimization techniques
- Studying Next.js framework for server-side rendering (SSR), static generation (SSG), and full-stack JavaScript development
- Learning testing frameworks (Jest, React Testing Library) and implementing automated testing practices for code coverage and reliability
- Studying system design principles, scalability concepts, and architectural patterns for building large-scale applications
- Actively contributing to open-source projects and engaging with the developer community through GitHub and technical discussions

LANGUAGES

- Urdu (Native Speaker)
- English (Professional Working Proficiency – fluent in technical communication, documentation, and business correspondence)
